

100ft Dome: Nurturing

This dome relates to lunar energies which provide nurturing at a divine feminine level, supporting and increasing the qualities of deeper intuition, powerful and effective speech and emotional/spiritual growth. Vibrationally these frequencies of sound and light connect conjointly with Saturn and Jupiter in ways which support stability, self-confidence, fulfilment and transformation or new life and fresh, new levels of creativity. The attaining of inner wholeness and one's optimal potential destiny are supported. The qualities of this wave form are represented by the opening of the petals of a flower. The basic circular form of the dome stimulates action and accomplishment rather than the deep relaxation and inner renewal of a more square geometric form also designed with sacred geometry. The circular, geodesic form is invigorating and assists in transmuting negative energy fields into positive vibrations.

High ethical standards and integrity of intention and action are integrated vibrationally to support excellent success and prosperity. Likewise the vibrating of this subtle musical instrument inspires one's natural bliss and enthusiasm into action and experience; these qualities interact and combine to ensure successful accomplishment of one's goals.

The empowering and effective qualities of this dome are magnified when the entry door is aligned to face 2.3 degrees north of true east. This alignment supports mental, emotional and spiritual health and enhances both intimate and extended community relationships. It supports the quality of surrounding air, water and soil for health of the environment, plants, animals and people.

The overall qualities resonate a positive and powerful integration between the human mind and the eternal spirit and will assist in bringing one's "less than joyous" thought patterns into the "light of awareness", assisting in the integration of those thought forms which no longer serve us in a positive way.
