

70ft Dome: Nakshatra Thiruvonam

Thiruvonam supports intellectual pursuits. This vibrational frequency and wave length is excellent for seminars, education, etc. It enhances one's ability to comprehend higher and hidden knowledge with spiritual as well as practical truths. It is excellent for charitable causes and for the attainment of positive and balanced wealth and fame. Dedication with courage in a worthy cause is both strongly supported in this wave length, and through such a commitment prosperity and success will be released in new and

sometimes surprising ways. All worthy endeavours which tend towards the benefit of all life will be blessed through the power of the universal energy grid (the connection with this grid is greatly enhanced by the correct placement of the entrance door: please see below for instructions for this alignment). The south direction is emphasized here and is recommended for the placement and alignment of the main entrance door. This southerly emphasis dynamically supports all endeavour, spiritual and material;

commercial, the arts, relationships, health and communications when these are undertaken through the soul's desire and intention to benefit all life, in all its forms. The heart tends to be opened in very deep ways when time is spent in this frequency. This opening serves to reconnect the inner consciousness with the higher awareness and the expanded connections of the soul which supersede the seeming limitations of time and space. Inner heart based intuitive actions, ventures and decisions are supported with potential of bringing great benefits to all involved. Balance and peace between factions and unity between dimensions are nurtured and empowered. The primary emphasis is the "re-emerging" and "merging" of all spiritual, emotional, and physical creativity and enjoyment in every experience of life.

Instructions for aligning the main entrance door to assist in maximizing the structure's conduction of the natural and powerful energies of the terrestrial and celestial energy grid systems. The qualities of this Nakshatra are enhanced by placing the Entry Door on the south of the structure and facing 2 degrees west of true south (true south is 180 degrees from true north, not magnetic north). This is accomplished by turning the entire structure until this alignment for the Entry is obtained.
