

ECOTOURISMDOMES

The Principles of Ecotourism

- Deliver memorable interpretative experiences to visitors that help raise sensitivity to host countries' political, environmental, and social climates.
- Recognize the rights and spiritual beliefs of the Indigenous People in the community and work in partnership with them to create empowerment.
- Generate financial benefits for both local people and private industry.
- Minimize physical, social, behavioral, and psychological impacts.
- Build environmental and cultural awareness and respect.
- Provide positive experiences for both visitors and hosts.
- Design, construct and operate low-impact facilities.
- Provide direct financial benefits for conservation.

Our Vision

Our vision is to create a sustainable and harmonious future for our planet and its inhabitants by providing energy-efficient geodesic domes for people interested in connecting with nature and minimizing their carbon footprint. Through partnering with organizations, communities and individuals with this shared vision, we support the preservation of nature while empowering local economies. We envision a world that works for everyone, and we are proud to offer a product which embodies the principles of conservation, stability, efficiency, and harmony with nature.

History

Founded in Ashland, Oregon in 1980 by Asha Deliverance, Pacific Domes was born amidst the gorgeous coastal landscapes of Madre Grande in Southern California. What began as a simple housing solution for members of a local monastery has since flourished into a global symbol for shelter and freedom. For over 30 years we have been working with the ecotourism industry, providing domes on every continent! From our backyard on the beautiful west coast, to the wilderness in the Highlands of Tanzania and many exotic points in between, our reach is global and we intend to boldly go where no shelter has gone before.

Geodesic Domes

Covering the largest area with the least amount of material, the geodesic dome structure is acclaimed by the American Institute of Architects as “the strongest, lightest and most efficient means of enclosing space known to man.”

Aerodynamic, earthquake-resistant, portable and energy-efficient, Buckminster Fuller created the geodesic dome as an expression of his desire to protect and advance all life and provide “more and more life support for all humanity, with less and less resources.” Utilizing the dynamics of tensegrity, the structure of nature, and the synergetic geometry of the sphere, the geodesic dome is perfectly balanced and creates a resonance field with all life around it.

Harmonic Architecture

Harmonic architecture is a philosophy which stems from a reverence for the interconnectedness of all life and promotes harmony between human habitations and the natural world. Every geodesic dome has a frequency, like the strings of a musical instrument, which creates a subtle harmonic ambient vibration which may be imperceptible to the senses but is uplifting for all biology. Many people are rediscovering health and healing through the harmonically attuned architecture of the geodesic dome.

RESILIENT

Our Eco Domes utilize the strongest architecture known to man. Easily sustaining high winds, heavy snow loads, and even earthquakes, the long-lasting and durable galvanized steel frame is engineered to withstand extremes in any climate or environment.

EFFICIENT

Geodesic domes require 30% less energy for climate control and require far less material to construct than conventional structures. Domes are a greener alternative to traditional building design.

SEMI PERMANENT

The strongest, lightest, and most efficient structure known to man, geodomes are built to last. Fully customizable, the dome of your dreams can become a reality which will be cherished and enjoyed for generations.

SUSTAINABLE

Using the minimum amount of resources to enclose the maximum amount of space, geodesic domes exhibit a core principle of sustainability by doing more with less. This advanced design is gentle on the local ecosystem and minimizes its environmental impact.

AFFORDABLE

Costing less per square foot than traditional buildings and creating far less material waste during construction, the efficiency of our domes reflects in added value and affordability for our clients.

PORTABLE

Geodesic domes pack up tight for easy shipping and transportation. They are designed to assemble and disassemble in a matter of hours while maintaining structural integrity and durability.

Start your own Eco Resort

A Great Investment Opportunity: Energy efficient, environmentally friendly, resilient, and versatile, our beautiful domes provide world-class comfort and luxury with a minimal carbon footprint. You can have one of our elegant domes for a fraction of the cost of virtually any other semi-permanent portable structure. Leave no trace in one of the strongest structures on the planet.

One of our clients purchased two 24 foot domes to get their glamping eco resort up and running. Within one week, they were booked for an entire year, and in only three months the cost of their domes and all the furnishings were entirely paid off! By the end of the year, they celebrated a 300% profit margin on their original investment.

ECOVILLAGES

In 1998, ecovillages were first officially named among the United Nations' top 100 listing of Best Practices as excellent models of sustainable living. An ecovillage is an intentional community which uses local processes to holistically integrate ecological, economic, social, and cultural dimensions of sustainability in order to regenerate social and natural environments. Aligned with Pacific Domes' vision of global sustainability and commitment to education and personal empowerment, Ecovillages around the world have found our shelter domes to be the perfect eco-friendly communal space and housing solution.

Eco Resort - Asilia, Africa

Eco Resort - Asilia, Africa

Ferme Des Etoiles - France

The image shows the interior of a geodesic dome structure, likely an eco-resort. A man and a woman are sitting on a wicker sofa, looking at a laptop. In the foreground, a black wood-burning stove with a fire inside is visible. The dome's wooden frame and translucent panels provide a view of a mountainous landscape. A small table with a vase of flowers and a glass of water is next to the stove. The overall atmosphere is cozy and natural.

ECO RESORTS

Good for your stress levels and for the environment, these destinations are both tranquil and invigorating, often featuring spa services and complimentary yoga classes alongside wilderness tours and sporting activities of all kinds. It's a vacation you can feel good about, from a highlands safari through one of the most unique ecosystems on the planet, to a world class ski resort in the majestic mountains of Switzerland, all are committed to preserving the surrounding land, benefiting local communities and employing local staff.

Asilia - African Safari

Nestled in the jungle-forest on the edge of the Highlands of Tanzania's Ngorongoro Crater, Asilia offers a wide range of ecotourism opportunities including wildlife safaris into the iconic crater, trekking adventures in the Rift Valley, and day hikes through the Serengeti Plains. Complete with luxurious, world-class accommodations provided by our Shelter Domes, all needs are provided for in abundant comfort and style.

GLAMPING

When you're glamping, there's no tent to pitch, no sleeping bag to unroll and no fire to build. This is the way to experience the great outdoors without sacrificing luxury. Offering a fabulous alternative for unforgettable experiences close to nature, glamping domes are becoming increasingly popular with adventure outfitters and glamping resorts alike.

Ridgeback Lodge - Canada

Domaine Arvor - France

Mile End - Australia

Located in Western Australia on a unique 144 acre estate, Mile End Glamping offers a premium camping experience with views of one of the most beautiful areas in the region. Set up perfectly for two people, each geodesic dome is luxuriously outfitted with a private bathroom, kitchen, king-size bed, and spa.

Fforest - UK

Fforest is a dream of the inspiration and beauty of the great outdoors. Combining ethically sourced material, period pieces, and the work of local artists, they have created relaxed, cozy, and comfortable experiences inside our gorgeous glamping domes.

Escape Podz - UK

Set in the middle of a private two acre field in Cornwall, England, the Escape Pod boasts a breathtaking panoramic view of the sea and surrounding countryside. With two bedrooms, a large bathroom, spacious living area, fully stocked kitchen, and even a 200 year-old olive tree, this is a geodesic dream home away from home.

Domaine Arvor - France

Heated by a large wood stove, the glamping dome in the French resort of Domain Arvor allows you to stay comfortable all year round. Complete with a private hot tub on the terrace, and an incredibly comfortable floating bed inside and furnished with antique furniture from the 1950's, this is a very unique glamping experience!

Domaine Arvor

Domaine Arvor

Glisten - France

Picture yourself in a striking, spacious, luxurious dome. This is not camping as you've ever known it. Hanging beds for the children, Fatboy bean-bags for all, king-size beds and high-quality mattresses, covered al fresco dining from a state-of-the-art 'plancha' gas cooker, room for everyone: this is camping with space, solidity, comfort and style.

AirBnB

Air BnB is a growing trend which is picking up traction all over the world. With more individuals taking advantage of a little extra room in their backyard for geodesic dome suites, these efficient structures pay for themselves in a short amount of time!

Chilean Elqui Valley AirBnB- Chile

"My friends and I had a wonderful time staying in the geodesic dome that looked like an igloo. What an amazing space! The dome is super cool, comfortable, and it's brilliant sleeping with the lid open under the stars. Waking up in the dome with the misty morning view of the Elqui Valley is incredible. Certainly an experience we will never forget. We will definitely be back!"

Elqui Valley AirBnB

Elqui Valley AirBnB

Catskills AirBnB - New York

“My stay in the Geo Dome was amazing! The incredibly spacious dome offers the perfect glamping experience, letting you fall asleep to visions of stars and wake up with a gorgeous view of the sun peeking out behind the trees! I recommend the dome to anyone looking for a personal getaway or a place to gather with friends. We loved it so much we didn’t want to leave.”

Catskills AirBnB

Asheville AirBnB - Virginia

“This was my first autumn night sleeping in the Dome, and it was soooo awesome! Seeing the stars though the bay window was incredible and listening to the crickets chirping and the slap of water against the docked boat was so peaceful. It’s a wonderful experience. I didn’t know it could be this good.”

WINTER RESORTS

Whether skiing through fresh powder, or relaxing with friends in the lodge, Geodesic Domes provide a warm and welcoming home base for all winter adventures. Built to withstand the frigid elements while providing a warm, welcoming and spacious suite, geodesic domes are ideal for experiencing the beauty and splendor of our natural environment while ensuring a high level of comfort in world-class accommodations.

White Pod Resort - Switzerland

This alpine eco-resort nestled in the majestic, snow-laden Swiss Alps offers a relaxing opportunity to connect with nature. After a day on the slopes and a hearty meal in the dining chalet, nothing beats the comfort provided by the 15 spacious and warm geodome pods.

White Pod Resort

Iglu Dorf - Switzerland

At an elevation of 8,950 ft in Zermatt, Switzerland, Iglu Dorf is an igloo dome village built each year right next to the Matterhorn. The dream of every snow enthusiast, the hotel, ice bar and thrilling ski slopes are open for guests from December through April in the highest altitude ski region in Europe.
